## Replacement EMD® Expansion Joints

As continual leaders in design and innovation, MPRCseals.com is meeting the demands of Tier expectations for Rail, Marine and Power Generation engines. This includes all exhaust components including gaskets and both 10" and 14" expansion joints. MPRC expansion joints are constructed with premium materials and tested for full range engine frequency (Hz). MPRC is proud to offer the following features and extensive testing process for the 14" and 10" joints:

### Technical Features:

- Bellows and End Ring are constructed of 321 Stainless Steel.
- Bellows are 3 Ply of 0.008 thick Stainless Steel.
- Flow Liner is constructed of 316 Stainless Steel.
- Carbon Steel flanges are protected with bellows blocks prior to installation.

### MPRCseals.com complete testing process:

- Thorough chemical analysis of material
- Detailed dimensional inspection of individual components
- Final dimensional inspection of assembly
